Disclosure and Management of Significant Financial Interest at the University of Michigan Training ("SFI Training")

U-M and unit-level policies require you to disclose information about non-University ("outside") interests, activities, and relationships that are related to your University ("institutional") responsibilities. These requirements help you and the University to comply with applicable regulations and ethical standards.

For example, if you are a recipient of research funding from a Public Health Service agency (e.g., NIH), you and the University must follow the Department of Health and Human Services (HHS) regulations for "Promoting Objectivity in Research."

To assist you with these and other requirements, the U-M Office of Research (UMOR) provides guidance regarding conflicts of interest and commitment in sponsored projects and with technology transfer.

Bookmark the Policy Links in the box to the right to reference the regulations, policies, and procedures related to disclosing outside interests and managing conflicts of interest, as needed. As you complete your disclosure in M-Inform, you are agreeing to follow these requirements and policies.

What does this mean for me?

The questions in M-Inform guide you through the disclosure process. Use the decision tree [found here] as you consider your answers. Keep the following definitions in mind:

- **Outside interest** – any paid or unpaid interest, activity, or relationship with an outside organization.
- **Outside organization** – an organization other than the University of Michigan or a Federal agency; may be domestic or foreign, public or private, for-profit or non-profit.
- **Related to your institutional responsibilities** – an interest, activity, or relationship that relies upon the same expertise as does your ability to carry out your University responsibilities; as well as any interest, activity, or relationship that has the potential to influence the duties that the University considers to be part of your work. In this regard, “Institutional responsibilities” means a person’s professional responsibilities on behalf of the University, such as research, teaching, professional practice, and institutional committee membership.

**Important! Update your disclosure within 30 days of any change**, including the acquisition or initiation of any new outside interest that is related to your institutional responsibilities.

Once your disclosure is submitted, it is routed automatically for review by the person who oversees your University responsibilities, and also to other University offices that screen the information to determine whether any additional requirements must be addressed.

I certify that I have read all of the SFI Training materials on the previous 2 pages and have reviewed the policies referenced from the associated links. *(Required for submission)*
