Effective communication is at the heart of every organization. In today's world, we send, receive, and process numerous messages every day. As we work to quickly respond to all the requests, we sometimes forget to be cognizant of how we are communicating.

In our U-M research administration community, communication happens over email, via phone, and within our eResearch Proposal Management (eRPM) system. It can be within or between units and central offices.

We recommend following these best practices for things we do every day. These were collectively compiled by representatives from units, from the Office of Research and Sponsored Projects, and from Sponsored Programs.

Remember that people who communicate effectively experience fewer misunderstandings and create less friction, which saves time and reduces mistakes.

Tips

- Be a good listener.
- Always watch tone in voice and writing.
- Set a communication reply goal. If you know you cannot respond within that goal, just let the asker know you will follow up and estimate when.
- Draft questions in the active voice for clarity.
- Minimize redundant communications (e.g., an e-mail to indicate that something has been posted in eRPM).

Utilize the 5 Cs.

Be Clear, Concise, Complete, Correct, and Courteous.

Thanks to:
Anthony Nielsen, Elizabeth Tropiano, Amanda Coulter, RAAC Process Committee, Heather Offhaus, Craig Reynolds, RAAC Communications Committee, Lisa Kisabeth, Heidi Madias, Leslie Chavez, Yvonne Sturt, Cathy Handyside, Constance Colthorp, and Pat Turnbull for their contributions to this.

"In a world of constant change, the fundamentals are more important than ever." - Jim Collins
@ WHEN TO EMAIL

Tips on best ways to use email

• When you want to document information for later support and clarification.
• When documentation in eRPM is not necessary.
• When clarification is needed before documenting in eRPM.
• For correspondence with a sponsor.

... & HOW

Always:

• Include good contact information in your signature, including your phone number.
• Include relevant U-M reference information as available:
  • Proposal Approval Form (PAF) number
  • Project Grant (P/G)
  • UFA (Unfunded Agreement) number
  • SSP (Special Sponsored Project) number
  • PI (Principal Investigator) name
  • Sponsor name and detailed contact information (if requesting that a central office contact them)
• Direct your email to the person you’re requesting response from (use “To” line appropriately).
• Copy interested parties when necessary (use “cc:” line and “Reply to All” wisely).
• Proofread for content and tone. When forwarding an email to reference, summarize and include the action requested.
• Re-iterate subject of text in the first line of an email.
• Put as much key information in the subject line as possible and include your question.

WHEN TO PHONE

Tips on when to pick up the phone

• When you need a quick confirmation or to speak with someone directly.
• When you are experiencing miscommunications (e.g., still not clear after writing back and forth).
• When you need to discuss complex situations or when multiple issues need resolution.
• When you don’t need physical back-up of resolutions.
• When you’re required to speak directly to a person.
• When routing a same day submission request.

... & HOW

Always:

• Identify yourself and why you are calling.
• Check to be sure if this a good time to talk and indicate how long you need.
• If you leave a voicemail, concisely leave all relevant information.

**This eRPM activity is available...**

- ...after the PAF is submitted to sponsor
- ...as soon as a new PAF is created
- ...once a PAF is submitted for approval (until it is routed to ORSP), and when ORSP returns PAF from their approval queue.

**When to use**

- Proposal Award Form (PAF) status change
- Forward Award Docs
- Use for all Post-Award Change Requests (require Form)
- Pre Award changes
- To create a permanent record in the system
- To relay information
- To attach documents to PAF
- When instructed by ORSP
- Request ORSP to return PAF to unit for changes prior to submission

**Hints:**
- You can opt to not select email recipients if you are just attaching a document for the historical record.
- If you do opt to select an email recipient, it is helpful to change the default subject line and/or the comment

**Tips:**
- Include all necessary information.

**Results**

- Each action request moves the PAF into the ORSP Project Representative’s (PR’s) and staff member’s eRPM inbox
- This activity updates information to PAF; the individual posting the comment controls whether emails are sent by checking/unchecking recipient boxes.

**Note:**
- All who have access to the PAF are able to see it

**Does it trigger email?**

- No
- Not necessarily. User-directed. An email is sent if a recipient is selected, otherwise it does not send an email.
- Yes, in every instance used, to everyone with approval access to the PAF

**Examples/Scenarios**

- PI indicates proposal has been turned down, use to update PAF Award docs sent to PI, request to process
- Requesting a no-cost time extension (NCTX), a re-budget, or any other categories available on Post Award Change Request form
- Sponsor requests a pre-award rebudget from PI
- Explain why the PAF is being routed late
- Upload requested documents after routing the PAF
- ORSP requests PI to indicate award acceptance.
- Share communications from the sponsor
- Upload final technical report at the end of the award
