Roles and Responsibilities

This document is provided to help define the Roles & Responsibilities of those involved in the identification, assembly, and submission of proposals related to sponsored projects. As further areas are addressed, the document will be expanded.

Proposal Development (Develop Proposal)

PI	UNIT ADMIN	ORSP	FSP	OTHER
----	------------	------	-----	-------

The Unit Admin column encompasses any research administrator, unit administrator, or higher level within the unit. Because many units across campus provide services in different ways, it was not possible to delineate these roles in a uniform way across campus. Individual units are encouraged to explore developing a companion list that best describes their home unit and delivery of services in their context.

Principal Investigators, however, do have specific responsibilities that are assigned under the Standard Practice Guide (SPG). Although often research administrators help perform these tasks, the PI has been reflected as responsible.

If you are unfamiliar with the RASCI system, you may view a brief, online tutorial:
