The Objective of the PCSA was to ascertain the ability of the University of Michigan's property control system to protect, preserve, account for and control Government-owned property in their custody. The PCSA included various tests and analyses of the institution’s internal management controls for property management, inventory procedures, reports, disposition activities and other areas as deemed necessary to perform the PCSA.

The University of Michigan Property Policies and Procedures have been reviewed for completeness and have been found to be acceptable.

The University of Michigan recently performed a physical inventory. The inventory was performed in accordance with their approved policies and procedures. There were no deficiencies identified during the physical inventory.

For the last property reporting period the University of Michigan submitted all 2 annual property reports in a timely manner. The annual reports that were submitted for this period contained accurate information.
The University of Michigan has routinely requested disposition instruction within a reasonable timeframe after the property is no longer needed for its assigned project.

The University has submitted their final property reports in a timely manner.

Based upon the results of this PCSA and in the judgment of the Property Administrator, the property control system at the University of Michigan is compliant to protect, preserve, account for and control Government owned property.
