*Title: Early Childhood Trauma Exposure With and Without Mental Health Intervention as a Predictor for Academic Performance in Middle/High School.

Major Goals: This project examines the potential correlation between early childhood exposure to traumatic events/experiences and subsequent academic performance in middle and/or high school. Separate arms of the study look at academic performance among those students who received post-trauma mental health intervention related to the trauma, those who received intervention unrelated to the trauma (i.e., coincidental with the trauma), and students exposed to trauma with no coincidental or subsequent interventions.

*Overlap (summarized for each individual):

The potential for budgetary/commitment overlap exists between the recruitment for subjects in some cohorts of R01-MH-654321 (Correlations of Social Media Usage and Academic Success Across Cohorts of Youth Diagnosed with Depression/Anxiety) and the proposed project, R01-MH-123456 (Early Childhood Trauma Exposure With and Without Mental Health Intervention as a Predictor for Academic Performance in Middle/High School). If proposal R01-MH-123456 is funded, effort level on R01-MH-654321 will be adjusted to account for any reallocation to the newly funded project.
